Introduction to Local Environmental Plans

This Fact Sheet provides information about how Local Environment Plans (LEPs) are developed and how the community can be involved. It is one of a series of Planning Fact Sheets which have been developed for Local Aboriginal Land Councils (LALCs) and the Aboriginal community by the NSW Aboriginal Land Council (NSWALC).

Please Note: While all care has been taken in the preparation of these Fact Sheets, they are not a substitute for legal advice in individual cases. The information in this Fact Sheet is current as of March 2011.

What is a LEP?

A LEP is a legal document which guides development and land use within a particular Local Government Area. LEPs outline what a landowner can or cannot do with their land and may provide for the protection of heritage and environmentally sensitive areas.

The law outlining the process for making a LEP is the *Environmental Planning and Assessment Act* 1979 (the **EP&A Act**). The EP&A Act is administered by the NSW Department of Planning.

LEPs are developed by the Relevant Planning Authority (RPA), or consent authority, in the area which they apply. This is usually the Local Council, but can also be the Director-General of the Department of Planning, or another person or body nominated by the Minister for Planning.

All land, whether privately owned, leased or publicly owned, is subject to the controls set out in the relevant LEP.

The creation of new LEPs

Most Local Councils in NSW have a current LEP in force. However, recent changes to the EP&A Act mean that all Local Councils in NSW must develop a new comprehensive LEP that conforms to a standard LEP template, known as the 'Standard Instrument'.

The template for the new standard LEP is set out in the *Standard Instrument—Principal Local Environmental Plan*. Several amendments were made to the Standard Instrument template in February 2011 including changes to zone

The Planning Minister has 'prioritised' 67 Local Councils meaning that they must update their LEPs to comply with the new Standard Instrument LEP by 2011. A few Local Councils have already completed their new LEPs. Some Local Councils who have not been prioritised are also making their new LEPs.

objectives and heritage clauses.2

As LEPs usually operate for five years there are limited opportunities for the public to comment before they are finalised.

It is strongly recommended that LALCs contact their Local Council and regional Department of Planning Office to find out what stage their LEP is up to.

Given that many Local Councils will be in the process of updating their LEPs to conform to the new Standard Instrument, this is the best opportunity for LALCs and the local community to negotiate the inclusion of certain zonings and provisions such as the protection of local Aboriginal culture and heritage. *Note:* See flow charts at the back of this fact sheet for how to have a say in the LEP making process.

PLANNING

March 2011

¹ The 'Standard Instrument – Principal Local Environment Plan' can be accessed on the NSW Legislation website at www.legislation.nsw.gov.au Click on 'Browse'. Under heading 'Browse in Force', see sub-heading 'EPIs'. Click on 'S'.

² Further information about the 2011 amendments can be accessed on the NSW Department of Planning website www.planning.nsw.gov.au under 'Local Planning', then 'Standard Instrument'.

Other environmental plans

The EP&A Act also outlines the process for making other environmental planning instruments (EPIs) to regulate competing land uses for local government areas, known as State Environmental Planning Policies, or SEPPs.

SEPPs can operate over part or all of the State and more than one SEPP may apply to the same area. If there is any inconsistency between a SEPP and a LEP, a SEPP will generally override a LEP.

EPIs are legally enforceable documents which must be complied with, and are complemented by **Regional Strategies**³ prepared by the Department of Planning. Regional Strategies set out the 25-year plan for future land use of a region.⁴

Glossary of Terms

DCP - Development Control Plan

EPI – Environmental Planning Instrument

JRPP - Joint Regional Planning Panel

LEP - Local Environment Plan

RPA – Relevant Planning Authority

SEPP - State Environmental Planning Policy

Development Control Plans (DCPs)

In addition to LEPs, local councils have the option to implement Development Control Plans (**DCPs**) where they feel more detailed planning provisions are needed in regard to a particular area.

DCPs must be taken into account by the decision maker when assessing development applications (**DAs**). DCPs may specify when the community will be notified that a development application has been lodged, and who in the community has a right to be notified.

Zoning

LEPs set the blueprint for future development and conservation in a given area by allocating

³ The Planning Minister issued new Directions under section 117 of the EP&A Act on 1 July 2009. The objective of Direction 30 Implementation of Regional Strategies "gives legal effect to the vision, land use strategy, policies,

outcomes and actions contained in regional strategies". Available at www.planning.nsw.gov.au. Under the heading 'Local Planning', click on 'Local Planning Directions'.

'zones' to different parcels of land. Each zone has a number of objectives which indicate the principal purpose of the land. The zone will limit what can be done with that land.

Previously, Local Councils could define their own zones meaning that there were large differences between Local Councils.

The new Standard Instrument LEP defines 34 different land 'zones' which fit into 8 broad categories: rural, residential, business, industrial, special purpose, recreation zones, environment protection zones, and waterway zones.

Most LEPs include a colour coded map or schedule which indicate what zoning applies to different land in an area. For more information on zoning see NSWALC Planning Fact Sheet 6 - Land Zoning and Local Environment Plans.

Culture and Heritage

New Standard Instrument LEPs must include special provisions to protect Aboriginal heritage. Previously this was not a requirement for all local councils. Local councils may also have Aboriginal heritage management plans.

For more information on culture and heritage and planning laws see NSWALC Planning Fact Sheet 3 – Planning Laws and Aboriginal Culture and Heritage.

How are LEPs made?

Local Councils who began their LEP making process <u>before</u> July 2009 will generally follow the 'old system' for making LEPs. Under the old process a Local Council develops a draft LEP and it is put on display for public consultation. Refer to the flow charts on the following pages for a step-by-step guide to the development of LEPs, including opportunities for having a say.

New 'gateway' process for creating LEPs

Any amendments to LEPs or new LEPs which started after <u>1 July 2009</u> are required to use a new process for approval. This new LEP process is known as the 'gateway' process.

The 'gateway process' begins with a **Planning Proposal,** instead of a draft LEP as under the old system. This Planning Proposal is developed by the Relevant Planning Authority.

The Planning Proposal is sent to the Planning Minister for review. The Planning Minister then decides whether the proposal should proceed

⁴ There are currently nine Regional Strategies in NSW that deal primarily with planning issues in the key growth areas across the State.

through the 'gateway' or not, and whether or not there should be community consultation.

It is important to note that under the new process only the Planning Proposal is put on display, not the draft LEP. There are also limited opportunities for the community to have a say during the development of the new standard LEPs.

The NSW Government has established an online tracking system for LEPs developed after 1 July 2009. If your Local Council's LEP is being made through the new 'gateway' process, the progress of the LEP can be monitored at: http://leptracking.planning.nsw.gov.au/.

What is a Planning Proposal?

The Planning Proposal explains the intended effect of the proposed LEP and the reasons for making it.

The Planning Proposal will include maps containing the appropriate detail, including landuse zones, heritage areas and flood prone areas, and will propose details of the community consultation to be undertaken.

Must the community be consulted about a new LEP?

No. Under the new gateway system the Planning Minister decides whether there will be community consultation, and what that community consultation should involve.

Unlike the old system, consultation is only available on the Planning Proposal, rather than the draft LEP itself so it is important to **contact your local council early** in the planning process and raise your concerns.

Amending a LEP

To amend an existing LEP, an application needs to be made to the Local Council or other RPA.

Any individual within the jurisdiction of the LEP may apply for the LEP to be amended. This includes applications for re-zoning particular parcels of land. LALCs should contact their Local Council or the Department of Planning to determine what information they need to submit with a re-zoning application.

All amendments to a LEP after 1 July 2009 need to go through the gateway process outlined below.

Challenging a LEP in court

Individuals are able to challenge a LEP in the Land and Environment Court. However, it is only under very specific circumstances that an appeal will be allowed. Appeals must be made within 3 months of a LEP being published on the NSW legislation website.

LALCs should contact the free advice line of the Environmental Defender's Office on 1800 626 239 if they are considering challenging a LEP.

Finding a copy of a LEP and other plans

Most Local Councils have a copy of their current LEP available on their website and will usually provide details about where they are up to in the LEP making process.

To find out what plans or EPIs affect a particular site, a LALC or individual can also obtain a 'planning certificate' from the Local Council. These certificates are also called 'section 149 certificates' as they are issued under section 149 of the EP&A Act.

Where to find out more

Copies of NSWALC Planning Fact Sheets can be downloaded from www.alc.org.au.

Contact details for all Local Councils are available from the Department of Local Government website at www.dlg.nsw.gov.au.5

Copies of all current LEPs and other EPIs are available from the NSW legislation website at www.legislation.nsw.gov.au.

⁵ For the directory of local councils, go to the Department of Local Government website www.dlg.nsw.gov.au, click on the 'Local Government Directory', and then 'Local Councils.'

Stages in the development of a LEP: OLD PROCESS

1. Decision to create a LEP

The Local Council, or another RPA nominated by the Planning Minister, decides to create a LEP.

2. Studies may be carried out

This can include environmental, heritage and land use studies.

3. LEP is drafted

Local Council prepares a draft of the LEP.

4. Consultation with Public Authorities Local Council consults with relevant government and public authorities.

5. Draft LEP is submitted to Dept of Planning

The Director-General of the Department of Planning reviews the draft LEP, and if satisfied with the LEP issues a 'section 65 certificate' to allow the LEP to be publicly displayed.

6. Exhibition of the draft LEP and Community Consultation

Draft LEP is put on public exhibition for a minimum of 28 days, along with any studies that have been conducted. At this time the community can comment on the Draft LEP, and there is the possibility for public hearings.

7. Consideration of submissions and revision of the LEP

At this stage the draft LEP may be updated or revised. The revised draft LEP may be reexhibited but often it is not.

8. Revised Draft LEP sent to the Dept of Planning

The Director-General of the Department of Planning considers the LEP and prepares a report for the Planning Minister.

9. Finalising and approving the LEP

The Planning Minister approves the LEP. The Planning Minister may decide to amend the LEP before approving it.

10. LEP comes into effect

The LEP comes into effect when it published in the Government Gazette.

HAVING A SAY: LALCs should contact their Local Council to encourage them to undertake an Aboriginal cultural heritage assessment. This is the best opportunity for influencing LEP provisions addressing Aboriginal cultural heritage.

HAVING A SAY: If LALCs are aware that the Local Council has not consulted with government agencies that hold information about Aboriginal heritage areas, such as DECCW, the Council can be lobbied to contact these agencies.

HAVING A SAY: LALCs can contact the Local Council and the Department of Planning to encourage them to put the Draft LEP out for community consultation. Also, if LALCs feel that further studies should be conducted before the Draft LEP is put on display, they should contact both the Local Council and the Department of Planning.

HAVING A SAY: This is the stage when the public can make written submissions. LALCs may also contact the Local Council to lobby for public hearings to be held.

HAVING A SAY: LALCs should contact the Department of Planning directly with any concerns and request that the final LEP is not approved until there has been further consultation. LALCs can contact the Local Council to encourage them to reexhibit the revised Draft LEP so that the community can provide more feedback.

HAVING A SAY: If LALCs have concerns, they can contact either the Department of Planning or their Local Council and encourage them to re-exhibit the revised Draft LEP in order to enable the community to provide further feedback. They can also request that the LEP is not approved until there has been further consultation.

PLANNING

March 2011

Stages in the development of a LEP: NEW PROCESS

1. Decision to create a LEP

The Local Council, or another RPA nominated by the Planning Minister, decides to create a LEP.

2. Development of the Planning Proposal

The Planning Proposal contains what is intended to be included in the LEP. Environmental, heritage or land use studies may be undertaken.

3. Consideration by Dept of Planning

The Planning Proposal is sent to the Department of Planning for consideration.

4. Gateway Determination

The Planning Minister (or a delegate) decides whether or not the process should continue: whether the Planning Proposal should proceed through the 'gateway'. The Minister can decide to send the Planning Proposal back, and the process will start again.

5. Consultation with government departments

The Planning Minister decides whether consultation is needed with any government or public authorities.

6. Exhibition and community consultation

The Planning Proposal may be sent to the community for consultation. It is usually put on public display for 14-28 days. Any concerns can be brought to the attention of the RPA through written submissions and public hearings.

7. Consideration of submissions and revision of the Planning Proposal

The Local Council or other RPA will consider the public submissions and may vary the proposal.

8. Writing the LEP

The Parliamentary Counsel writes the LEP based on information provided by the Department of Planning and the Local Council or other RPA.

9. Approval of the LEP

The draft LEP is submitted for approval to the Planning Minister (or a delegate).

10. LEP comes into force

The LEP comes into force once it has been published on the NSW legislation website.

HAVING A SAY: LALCs should contact their Local Council or other RPA during this stage, as this is when key decisions are made about how Aboriginal heritage issues will be addressed in the LEP. RPAs may hold public consultations before developing the Planning Proposal, but they do not have to.

HAVING A SAY: Although there is no formal consultation at this stage, LALCs can contact the NSW Planning Minister and Department of Planning directly if they have concerns, and encourage the Minister to send the Planning Proposal back for further revision rather than let it through the 'gateway'.

HAVING A SAY: If LALCs are aware that the Local Council has not consulted with government agencies that hold information about Aboriginal heritage areas, such as DECCW, the Council can be lobbied to contact these agencies.

HAVING A SAY: If the Planning Proposal is to be exhibited, the public will normally be able to make written submissions at this stage. The submissions are made to the Local Council or other RPA.

HAVING A SAY: If there are still concerns, LALCs can write to their Local Council, their regional Department of Planning office or the Planning Minister directly. LALCs can also contact other relevant Ministers, such as the Minister for Aboriginal Affairs and the Minister for the Environment.

PLANNING
